Sixth-semester Software Engineering student specializing in mobile development with React Native. Strong focus on effective communication, problem-solving, and teamwork. Passionate about developing innovative and scalable technological solutions. Self-driven learner constantly exploring new technologies and computing concepts.

EXPERIENCE

Sep 2024 – Dec 2024

Emerging Technologies Trainee | Mirai Innovation Research Institute | Osaka, Japan | On-site

- I developed a responsive web application using React and Bootstrap, along with a mobile app in React Native integrating OCR technology. I implemented the backend with Express and MongoDB, and integrated ChatGPT to process and simplify the extracted text. I added real-time chat functionality using WebSockets and designed a scalable architecture. I also implemented a user authentication system.
